

PRESIDENTIAL DRIVE ACCELERATES ELECTRIFICATION IN WESTERN KENYA

Electrification efforts in Western Kenya have received a significant boost following a series of high-level engagements led by the President. In Kakamega County, projects valued at billions of shillings are set to connect tens of thousands of households, transforming livelihoods and driving economic growth. The flag-off of the Nderema Village Electrification Project and the commissioning of projects in Khwisero Constituency demonstrate the scale and impact of ongoing interventions. Communities are already witnessing transformation, with businesses expanding and new economic opportunities emerging.

LAST MILE CONNECTIVITY DRIVES INCLUSIVE GROWTH IN BUNGOMA COUNTY

In Bungoma County, last-mile connectivity projects are expanding access to electricity across multiple constituencies. Investments amounting to billions of shillings are targeting tens of thousands of households, ensuring that communities benefit from reliable and affordable energy. These projects are expected to enhance healthcare delivery, support education, and stimulate small and medium enterprises, reinforcing electricity as a key enabler of inclusive growth.

POWERING THE COAST: ELECTRIFICATION EXPANDS ACCESS IN KILIFI COUNTY

Powering the Coast: Electrification Expands Access in Kilifi County
REREC has intensified electrification efforts in the Coast region, with major projects launched and commissioned in Kilifi County. Projects in Dabaso, Matsangeni, and Kahingoni are set to connect over 300 households, while additional initiatives in Malindi will benefit more than 600 households.

These interventions are part of a broader strategy to expand access to electricity and stimulate economic growth across the region. Improved access to power is expected to enhance business activity, strengthen public services, and elevate living standards for communities along the Coast.

REREC has taken a significant step toward expanding electricity access in informal settlements through the rollout of the People Settlement Areas Phase II (PSA II) Programme in Nairobi. A multi-agency implementation framework is being developed to guide electrification efforts in key settlements.

The programme aims to provide safe, compliant, and sustainable electricity connections, addressing challenges associated with illegal connections while improving public safety and health outcomes. Through structured stakeholder engagement and data-driven planning, the initiative is set to deliver inclusive and impactful solutions for urban communities.

ADVANCING ELECTRIFICATION IN INFORMAL SETTLEMENTS

EXPANDING ACCESS IN KERICHO: LARGE-SCALE ELECTRIFICATION TARGETS OVER 750 HOUSEHOLDS

In Kericho County, the launch of electrification projects in Momoniat, Kimaut, and Umoja villages marks a significant expansion of electricity access. The initiative is set to benefit over 750 households, supporting economic growth and improving service delivery in the region.

These projects are part of a broader effort to scale up last-mile connectivity, ensuring that rural communities are fully integrated into the national grid.

In Nyeri County, the launch of multiple rural electrification projects in Kieni Constituency is set to expand access to electricity for households and institutions. The projects will support education, enable business growth, and improve livelihoods across the area.

These initiatives reaffirm the Government's commitment to universal electricity access and highlight the continued progress in connecting communities across the country.

REREC's advocacy efforts continue to deepen community engagement through targeted outreach initiatives such as market activations in Samburu and Narok counties. These engagements provide a platform to sensitise communities on electrification, renewable energy, and clean cooking solutions.

By directly engaging residents, traders, and local leaders, the Corporation is ensuring that its programmes are inclusive, responsive, and aligned with community needs.
